INTRODUCING GREENPLY'S GREEN FLOORMAX FLOORING

.....

Untie your shoes. Slip out of those socks. Flex your bare toes and take a step in. Welcome to the Green Floormax home.

As your eyes take in the rich elegance of our floors, your feet will sense a myriad of unique textures. Floors are at the heart of all homes. Our carefully crafted Green Floormax Floors ensure that this heart is always warm, inviting and inspiring. The flooring doesn't merely decorate but enriches everyday living with timeless beauty.

As you turn the pages of our catalogue, you'll notice how art and function blend in each pattern. Go ahead, bask in the glow of nature. The Classic Oak, Autumn Walnut, Himalayan Merbau, Silver Streaks and many more from the great outdoors will now be a part of your home.

----- WHY GREEN FLOORMAX -----

is the best choice
FOR YOU?

Green Floormax comes with a warm wooden finish that extends an inviting look to your home. The natural wood design of the floor effortlessly creates an exotic, yet comfy air.

What's more, the specially engineered surface protection technology of Green Floormax makes it super sturdy, durable and resistant to scratches, stains and water spills. In other words, no more fretting over child and pet messes.

Installing Green Floormax is a breeze too! You'll be surprised at how quickly and easily the whole floor is laid out. The great thing is that you can move an entire floor from one room to another in no time, whenever you fancy a change in look.

Still on the fence? Here's a comprehensive list of reasons why you should switch to Green Floormax flooring.

.....
UNMATCHED ELEGANCE
.....

If you're looking for something contemporary yet cozy, Green Floormax flooring should be your pick.

The wide variety of colours and textures in the offering can create an ambience like no other. Our surface designs have been hand-picked in collaboration with renowned designers from Europe and crafted with a passion that reflects in the unique character of Green Floormax flooring.

.....
TECHNICALLY SUPERIOR

The PERMACLICK™ system in Green Floormax has been developed especially for Greenply by flooring industries, Luxembourg. Their years of research combined with Greenply's extensive knowledge of the usage conditions specific to India, has made PERMACLICK™ one of the most advanced flooring interlocking system available in the country. This system gives Green Floormax an unmatched quality and finish. What's more it makes the installation process very easy.

LICENSED INTERLOCKING SYSTEM

Greenply is a licensee of flooring industries, Luxembourg and the first and only Indian manufacturer with a licensed interlocking system. All Green Floormax products comply with worldwide intellectual property and patent statutory requirements. To ensure the authenticity of a licensed product, each box of Green Floormax comes with a tamper proof L2C holographic label issued directly by flooring industries, Luxembourg*. To read more about the importance and benefits of a licensed interlocking system, please visit the webpage of flooring industries, Luxembourg at www.unilintechnologies.com

*For further details visit www.L2Clabels.com

SCRATCH RESISTANT

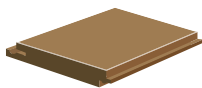

Green Floormax flooring comes with MAX SHIELD – A unique scratch resistant protection technology that shields it against wear and tear. This specially-engineered surface coating makes floors manifold stronger and resistant to surface scratches.

SOUND ABSORBENT

Green Floormax is engineered with SONIC SPONGE – An advanced technology that allows the sound absorbent backing layer to reduce sound transmission and produce only a solid and pleasant sound underfoot.

100% HARDWOOD BASE CORE

The high density fibreboard at the core of Green Floormax floors makes them sturdier and more durable than any other flooring alternative. More so, Greenply manufactures the highest quality fibreboard in house at the same manufacturing location as the rest of the flooring components, ensuring very stringent quality parameters for the base core.

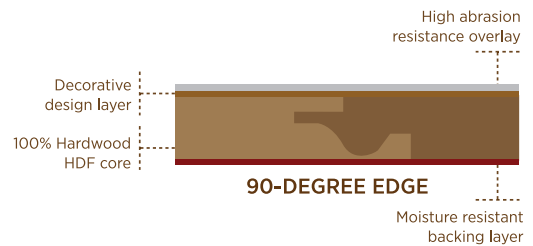

HYGIENIC AND EASY TO MAINTAIN

Our surface protection technology ensures dirt doesn't cling to your floor while our precise interlocking system PERMACLICK™ binds the planks perfectly, allowing absolutely no room for dust to accumulate.

PERMACLICK™ - THE MOST SUPERIOR CLICK LOCK SYSTEM

Unlike many floors, Green Floormax floors do not have beveled edges or a V-Groove, rather a 90-degree edge between two planks.

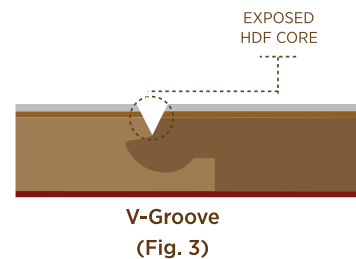

Due to imperfections in the manufacturing process of unlicensed interlocking systems made by other manufacturers, two adjoining wood planks do not sit level but are at different heights. This results in the edge of one plank being higher than that of its adjoining plank (FIG. 1).

In such a situation, a 90 - degree angle results in a very sharp edge, creating a risk of injury when walking barefoot or a risk of tripping. To overcome this imperfection of the profile, the edges are beveled or shaped in a V-Groove to provide a gentler angle between the planks (FIG. 3).

The process of beveling or V-Grooving involves trimming of each 90 - degree edge, resulting in the removal of the high-abrasive resistant layer and the decorative design layer which exposes the inner HDF core of the flooring (FIG. 3). Since the protective layers get removed, this makes the HDF core highly susceptible to water ingress as well as accumulation of dirt.

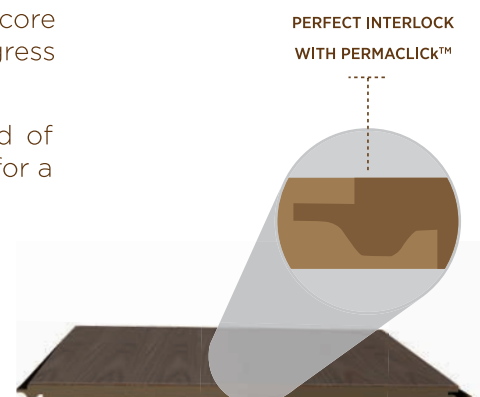

Due to the unique PERMACLICK™ interlocking system of Green Floormax flooring, the edges are always level. There are no surface imperfections or edges sticking out.

This means Green Floormax floors have 90 - degree edges that are safe, locked together with no portion of inner HDF core exposed. As a result, the floor is highly resistant to water ingress and dust accumulation.

Green Floormax floors have a unique angle snap method of layout that fits the planks together at a 90 - degree angle for a perfect seamless finish.

The tensile strength of the click system seals off the floor with an airtight finish that doesn't let liquid seep in and provides superior protection against moisture. As a result, our floors are more durable with minimal wear and tear.

.....
CONVENIENT
.....

EASY TO INSTALL

Thanks to our PERMACLICK™ system, installation can be completed in no time. Just snap the planks together and it's done.

SEAMLESS LAYOUT

Our linking technology leaves no annoying gaps or crevices, leaving you with a level, beautiful-looking floor. There just won't be any place for dirt and dust to accumulate.

ANTI-WARP

Since the top layer on Green Floormax floors is resistant to heat and temperature changes, there won't be any uncharacteristic bending or twisting of the wooden planks. Your floor will always stay solid and level.

EASILY REMOVABLE/CHANGEABLE/REINSTALLABLE

Switching floors just involves removing the planks and installing them elsewhere. Carry your floors with you anytime, anywhere.

.....
COMMERCIAL APPLICATION
.....

PLUS

Green Floormax Plus, the AC4 grade flooring range, is high abrasion resistant with a thicker surface protection layer. It is an ideal choice for commercial spaces like offices, retail stores and hotels. The great thing is that these floors don't require a long and tedious process of installation unlike traditional materials like marble and tile. They also work out to be more cost-effective.

What's more, these floors can be laid over nearly every subfloor (be it concrete, stone, vinyl or ceramic) as long as it is level, clean, and dry.

Oh and if you're planning to shift business location, you can always remove the planks and take the floor with you.

-----HOW TO CHOOSE-----
the right floor
IN THREE EASY STEPS

Selecting a design may seem overwhelming, but it doesn't have to be. Floors can be easily picked to complement your interior décor. An earthy, rugged wood design will bring your space closer to nature while smoother, lighter and softer grains will lend a subtle elegance that's chic and urbane.

Choosing a lighter wood colour will make a confined space look larger and more open while darker shades will make a large room appear cozy and intimate. Also do consider the tones of your furniture and walls for making a perfect complementary choice and achieving the right balance in your interior décor.

Green Floormax offers you an array of designs in authentic, rich wood species and textures that accentuate the natural look of wood grains, lending incomparable warmth to your home.

Here's a basic guide on what to keep in mind while selecting your floor

1

CHOOSE YOUR DESIGN

.....

ALLOVER DESIGN

A distinct collection of wood designs that has the look and feel of exotic wood grains in every single tile format. This flooring style leaves you with a seamless and natural look of wood.

PLANKED DESIGN

This pattern has a more handcrafted appeal. Each wooden tile is put together in an array of 2-3 slim tiles interspersed with grains and crown, creating a rich and intricate canvas of natural woods.

2

CHOOSE YOUR TEXTURE

.....

OPEN GRAIN

Straight Line Effect

CROWN

Curvy Dynamic Effect

3

CHOOSE YOUR GRADE

.....

AC3

Recommended for residential and low footfall areas.

AC4

Recommended for commercial and office spaces or high traffic areas like retail outlets and malls.

----- HOW TO -----

maintain your FLOORS

Green Floormax floors are easy to maintain and clean. The laminated top layer on each floor makes it so much simpler to keep it spic and span year after year.

These floors do not need any special cleaning agents or methods, just a squeezed out damp mop will do. If a plank undergoes damage, you don't need to worry too much, just replace that particular plank and your floor is as good as new.

FEW THINGS TO KEEP IN MIND WHILE CLEANING GREEN FLOORMAX FLOORS

- Sweep the floor using a standard dust mop to remove dirt and dust. When necessary wipe the floor with a squeezed out damp cloth, using only water.
 - In case of spills, just wipe the floor with a dry cloth.
 - Do not use any soap-based detergents or household cleaners to clean the floor.
 - The surface of your flooring requires no additional treatment. No need to use wax, polish, oil or varnish on the floor.
 - Do not use any type of abrasive cleaners or steel wool which may damage your floor.
 - Use felt pads/rubber feet under furniture legs to avoid scratching and do not drag when moving furniture.
 - Entry mats will help in collecting sand, dirt, grit and other substances, that may otherwise harm your floor.
-

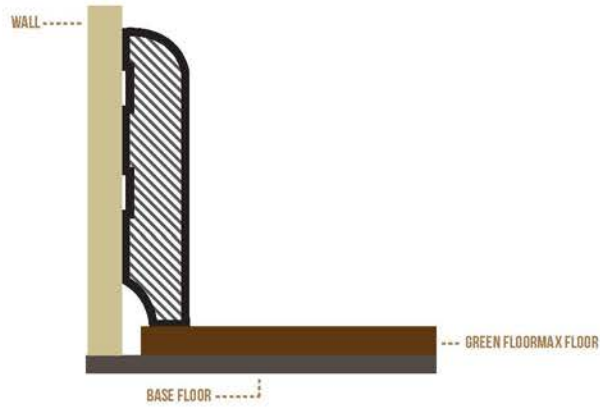

THE BEST
accessories
TO GO WITH

Add the perfect finishing touch with Green Floormax skirting and profiles. To complete the look of your stunning floor, you can choose from a wide range of designs that match every floor and style.

SKIRTING

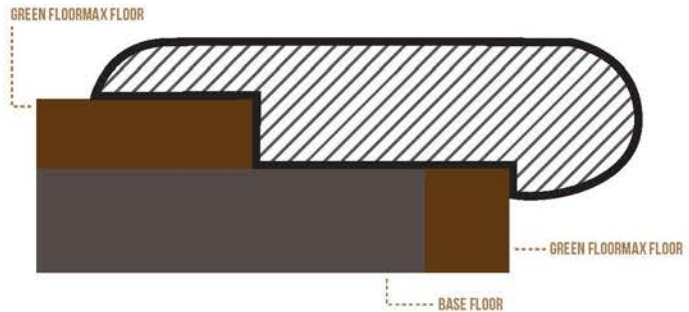

Provides finish to the floors by cladding the lower part of the adjoining walls.

STAIR NOSE

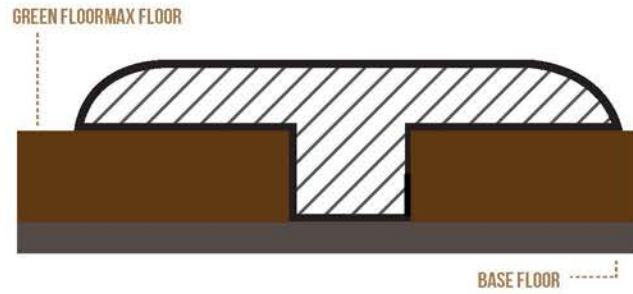

Covers the open edges of the floor planks and provides a seamless transition between the horizontal and vertical sections of the staircase.

T PROFILE

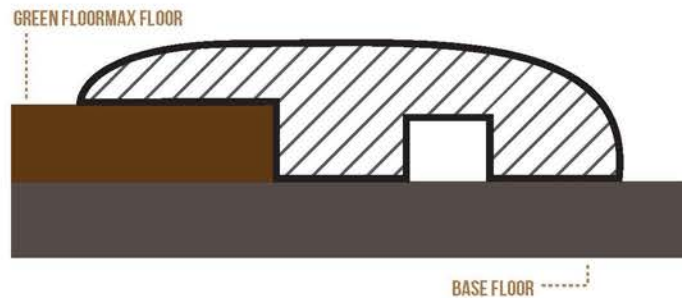

Connects two sections of the floor at the same height.

REDUCER

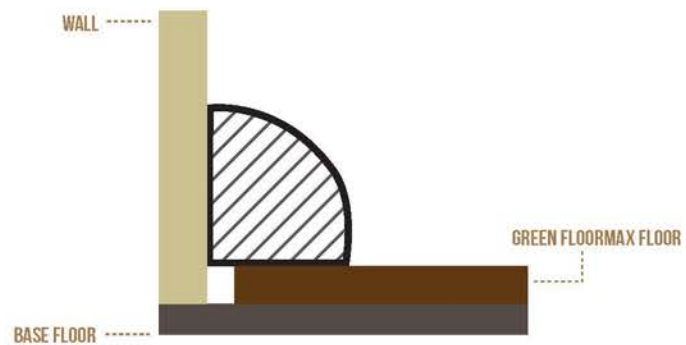

Provides a smooth transition from the floor to a lower surface such as tiled floor or carpet.

BEADING

Creates a border between the floor and adjoining walls. Can be used as an alternate to skirting where skirting is not used.

UNDERLAY

Greenply premium 2-in-1 underlay is a combination of a 2 mm underlay and a PE foil. With the ease of just rolling out the underlay, you can level the subfloor irregularity, as well as reduce the risk of transferring humidity from the subfloor to the floor panels.
